

**TRAFFIC RECORD FOR TORINO AIRPORT:
OVER 400,000 PASSENGERS IN JUNE 2022,
BEST MONTH EVER FOR THE AIRPORT**

*In June 2022 Torino Airport recorded 403,401 passengers,
surpassing the previous record dating back to July 2017
Traffic volumes grow +21.3 percent compared to pre-Covid June 2019*

Caselle Torinese, July 6, 2022 – A **new record** for Torino Airport traffic. In June 2022, the airport set a traffic record, registering **403,401 passengers and beating the previous record** dating back to July 2017, when volumes were 388,502 passengers.

The month of June 2022 is thus confirmed as **the best month ever in the history of Torino Airport**, far surpassing the figures also recorded in the same pre-Covid month: in 2019, June traffic volumes had been 332,445 passengers, up **+21.3 percent** in 2022.

Compared to 2019, a total of **23 new routes** in June were not operated in the pre-Covid period: **Agadir, Billund, Wroclaw, Budapest, Copenhagen, Corfu, Krakow, Crete, Dublin, Edinburgh, Lanzarote, Malaga, Paris Beauvais, Pescara, Prague, Seville, Tel Aviv and Zadar** served by Ryanair; **Athens** served by Volotea; **Gran Canaria** served by Binter; **Iasi and Skopje** served by WizzAir; and **Paris Orly** served by Vueling.

The **load factor** of scheduled flights as of June 2022 also **increased to 80.9%** (+4 percentage points over May 2022), demonstrating that by increasing supply, the market is responding positively: the drive is also due to the connections launched during the 2021/2022 winter season, which are gradually being consolidated. Among them, Northern European destinations such as Billund, Copenhagen, Dublin, and Edinburgh are registering a significant growth trend.

Among the destinations driving traffic in June 2022 are **Catania, Naples, Bari, Palermo and Lamezia Terme** on the domestic side and **Barcelona, Paris CDG, Madrid, Frankfurt and London Stansted** on the international side.

In June 2022 compared to the same month in 2019, **domestic traffic increased by +28 percent** thanks to the sharp increase in supply put in place by airlines; **international traffic also grew by +16 percent** thanks to several new routes.

The offer of **low-cost airlines** is expanding, reaching a **total share of 80 percent** of total traffic.

The wide choice of flights available to and from Turin at **very advantageous prices** allows passengers an extended possibility of combining schedules and fares and increases the connectivity of the area as never before. In fact, the expanded flight network, which now includes 57 destinations, 43 of which are international, represents a growth opportunity for Turin and Piedmont, thanks to the possibility of moving new flows of **incoming tourists** from previously unserved markets that can now be reached at **competitive fares**.

Torino Airport's flight network is continuously expanding: in July 2022, new low-cost connections to **Santorini** and **Mykonos** by Volotea, and **Reggio Calabria** by Blue Air will be added; overall, the number of weekly flights offered by Torino Airport during the summer season will grow by +53% compared to the summer of 2021 and by +19% compared to the summer of 2019.

The summer growth sets the stage for a promising winter season: in fact, **3 new international connections** operated by Ryanair, **Stockholm**, Sweden, **Manchester**, Great Britain, and **Vilnius**, Lithuania, are already open for sales.

Following is a map of the connections available from Turin Airport in Summer 2022.
