Press release

TORINO AIRPORT SETS A NEW RECORD
FULL-YEAR 2025 RECORD OF 5 MILLION PASSENGERS EXCEEDED ALMOST TWO MONTHS BEFORE YEAR-END

An expanded flight programme offers further opportunities for growth in the winter season now under way

Caselle Torinese, 5 November 2026 – Torino Airport surpasses today its full-year 2025 record of **5,006,169 passengers**, almost two months before the end of 2026. This **milestone confirms the continued growth of the airport in Piedmont**, with this year's passenger total already higher than that recorded in its previous busiest year.

This milestone follows a series of traffic records: each month of 2026 to date has been the busiest on record for that month, exceeding the corresponding total in 2025. **October 2026 was Torino Airport's busiest month on record**, with **540,000 passengers** (up 25.6% on October 2025). The **week from 26 October to 1 November** was also the airport's busiest ever, with **135,000 passengers**.

The 2026/2027 winter season, which began on 25 October, offers scope for **further growth in passenger numbers**, supported by a **significantly expanded flight programme**. With more routes than in any previous winter season, the programme strengthens Torino Airport's connectivity and gives passengers more travel options.

The opening of Wizz Air's base, the addition of new destinations and more frequent flights on existing routes with strong demand are among the main factors supporting Torino Airport's growth.

New services already operating include **Bilbao**, served in winter for the first time by Wizz Air and Vueling since 25 October; **Budapest and Bratislava**, launched by Ryanair on 25 and 26 October respectively; and **Sharm el Sheikh**, served by Wizz Air since 27 October. Wizz Air also launched flights to **Lamezia Terme and Malaga** on 25 October and **Madrid** on 26 October; services to **Naples** will follow on 1 December, and **Suceava** on 18 December. Having several airlines operating on the same routes provides a wider choice of travel days and flight times and supports competitive fares.
Services introduced during the summer will also continue through the winter: **Malaga and Tirana** with Ryanair, **Rome Fiumicino** with Wizz Air and **Salerno** with Aeroitalia.

The flight programme supporting ski tourism is also expanding, benefiting the mountains of Piedmont and the north-western Alps. In Poland, services to **Wrocław, Gdańsk, Katowice and Warsaw** will be operated by Wizz Air and Ryanair, with LOT also serving the Polish capital. Further services will

include **Prague** with Wizz Air and Ryanair, **Riga** with airBaltic and, from the United Kingdom, **Glasgow Prestwick** with Ryanair and **London Gatwick** with Jet2.com.
Flight frequencies are also increasing to **Barcelona, Madrid, Malaga and Valencia, Budapest and Tirana**, as well as to the domestic destinations of **Catania, Lamezia Terme, Naples and Palermo**.

The winter programme covers **24 countries, 93 routes and 62 destinations**, including 46 international and 16 domestic destinations. Torino Airport continues to play a strategic role in supporting tourism and connectivity in north-western Italy.
